L2 Length _____

INSTRUCTIONS

- (1) Make copies of this page, distribute them to anyone responsible for design, welding, engineering, etc. and follow the instructions below.
- (2) On the table to the left CHOOSE the applicable information.
- (3) On the drawing above fill in the length of tangent desired for L1 and L2.
- (4) Fill in the quantity, date, company name, contact name, phone number and click the submit by email button

**We can also provide combination weldments using various fittings and/or flanges.
Ask us about any fabrication needs you might have.**
